USTH Student Information Management

Basic Database Final Project

Group 6

University of Science and Technology of Hanoi

ICT Department

June 10, 2019

Section 1

Problem and Idea

USTH student problem

- Hard to access the student information from student side

- Too many place to access information but lack of place to navigate

Idea for solving

- Navigate all basic information to 1 place
- Open access for all student can see information
- Easy to synchronize some neccessary information

What students can see ?

- Students can access to all marks information from year 1 to year 3

- Students can see all course information including timetable, lecturers's information, ...

- Students can see all tuition fees that they have paid or have not fully paid yet and also their scholarships information

# Student information schema

Diagram table

Figure 2: Diagram

Constraint

- ID: type varchar(10)

- Money: type varchar(20)

- Date: type datetime

- Points: type double

- student's information: type varchar()
